LEVANTINA GROUP MARBLE

LEVANTINA
THE STONE COMPANY

The benchmark in the world of stone

Levantina Group is an international company, with its origins in Spain, that has become the benchmark in the Natural Stone sector. Since its inception in 1959, the company has grown progressively and expanded with great strength in the international market, becoming a true benchmark in the construction materials and cladding sector for any type of surface in the architecture and interior design and décor space.

Levantina Group is committed to environmental, economic and social sustainability.

We want to surpass our own expectations and achieve this through entrepreneurship, working as a team to reach our common goal. Our focus is on sharing, being clear and transparent, and remaining steadfast in our commitment to the company's future.

We have an international vocation far beyond the world of production and natural stone.

LEVANTINA

THE STONE COMPANY

Levantina Group resources

Levantina has a wide network of its own quarries, which allows it to retain full control over the production and supply of materials. This gives the company great flexibility and allows it to handle large-scale products. Levantina Group boasts the largest deposit of Crema Marfil marble in the world, located in the Monte Coto quarry in the province of Alicante (Spain), which has allowed the Group to become a leader in the market.

High production capacity

Levantina Group has a long history of supplying natural stone for large-scale architectural projects across the globe. Its 7 production sites, with high-volume production capacity and specialisation in different types of stone, allow the Group to offer quick response times and optimal quality of service. Rigorous controls guarantee the highest quality of the materials and production processes, as demonstrated by the ISO 9001 certification.

A Global Brand

Levantina Group has a global presence, with quarries and production sites in many countries. Its products are marketed in more than 100 countries through a wide network of distributors. It also has 19 of its own distribution centres, known as Stone Centers.

Levantina Group boasts a powerful logistics service that manages more than 150,000 shipments per year. In addition, the logistics and transport department has a high level of technical expertise and is able to advise on complex customs procedures and requirements, as well as incoterms, packaging, or any other logistical matter, with the aim of improving the purchasing experience.

Sustainability

Levantina Group's commitment to the environment is based on the fundamental pillars of sustainable development and business ethics, spanning the entire lifecycle of our products. For this reason, it allocates its stone waste for the restoration of old clay quarries, including reforestation with native/endemic species, and the promotion of increased biodiversity in the area through landscape regeneration. The company therefore contributes to reducing the environmental and visual impact of its activity, and to improving the natural environment of the province in which it carries out its business activity.

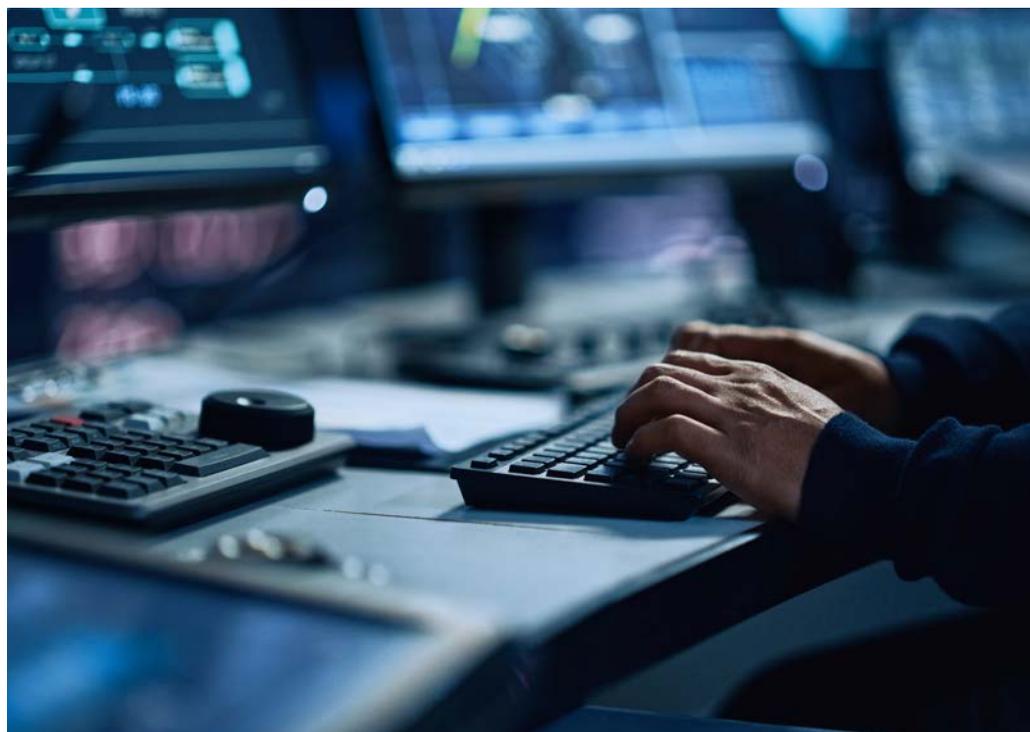

As part of Levantina Group's approach to sustainability, it is committed to shining a light on its clients' concern for the environment by creating high-quality products that have the added value of respecting the world around them and the natural resources used, as well as protecting the health of its clients. The products marketed by the company, following an integrated management system based on ISO 9001, have obtained the following environmental acknowledgements, including the ISO 14001 and Global EPD certificate, which can help any construction project obtain the LEED, BREEAM or VERDE certificate.

Innovation

Innovation is a key element in Levantina Group's process and product development strategies. Investment in R&D is aimed at providing innovative solutions in line with the latest market trends, applying the most advanced technology to stone and other materials.

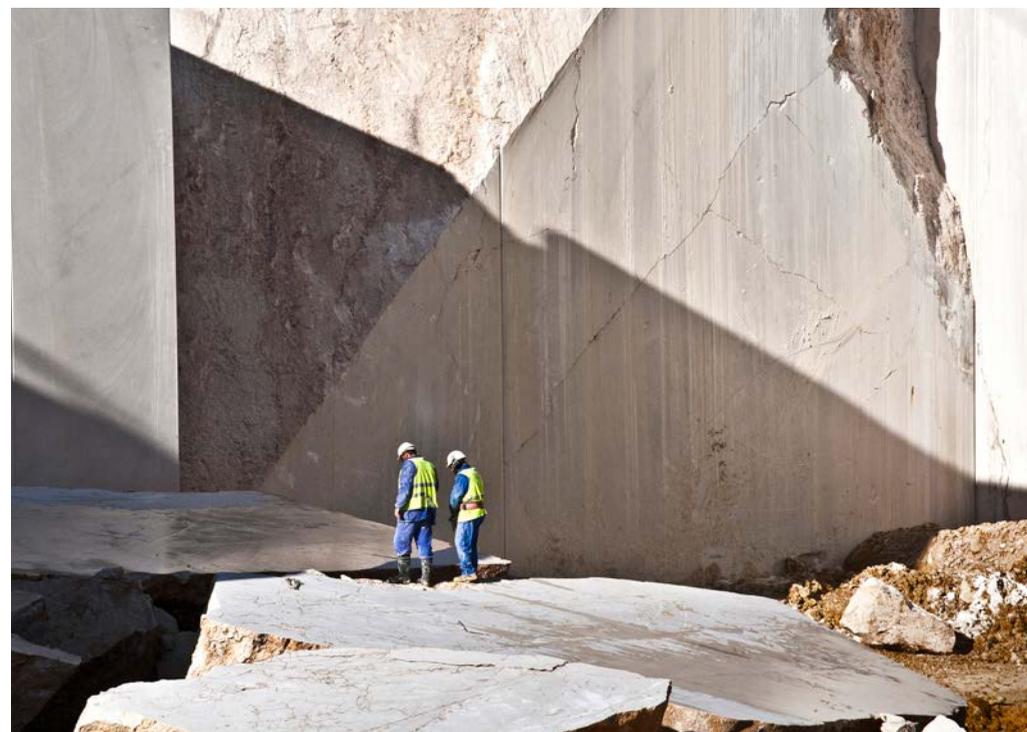

Within the scope of innovation at Levantina Group, one of the main pillars is the research and development of new technology to create installation and maintenance systems, anti-stain and anti-slip methods, and other applications for its materials, taking into account innovation in finishes and formats at all times.

Safety First

Health and safety is one of the key values of Levantina Group's mission, as being a leading company in the Natural Stone sector also means being a leader in health and safety standards.

Levantina Group is committed to creating a safe working environment for all, including its employees, contractors, communities and clients. The company considers safety to be a fundamental value and works to create a safety culture at all levels and operations.

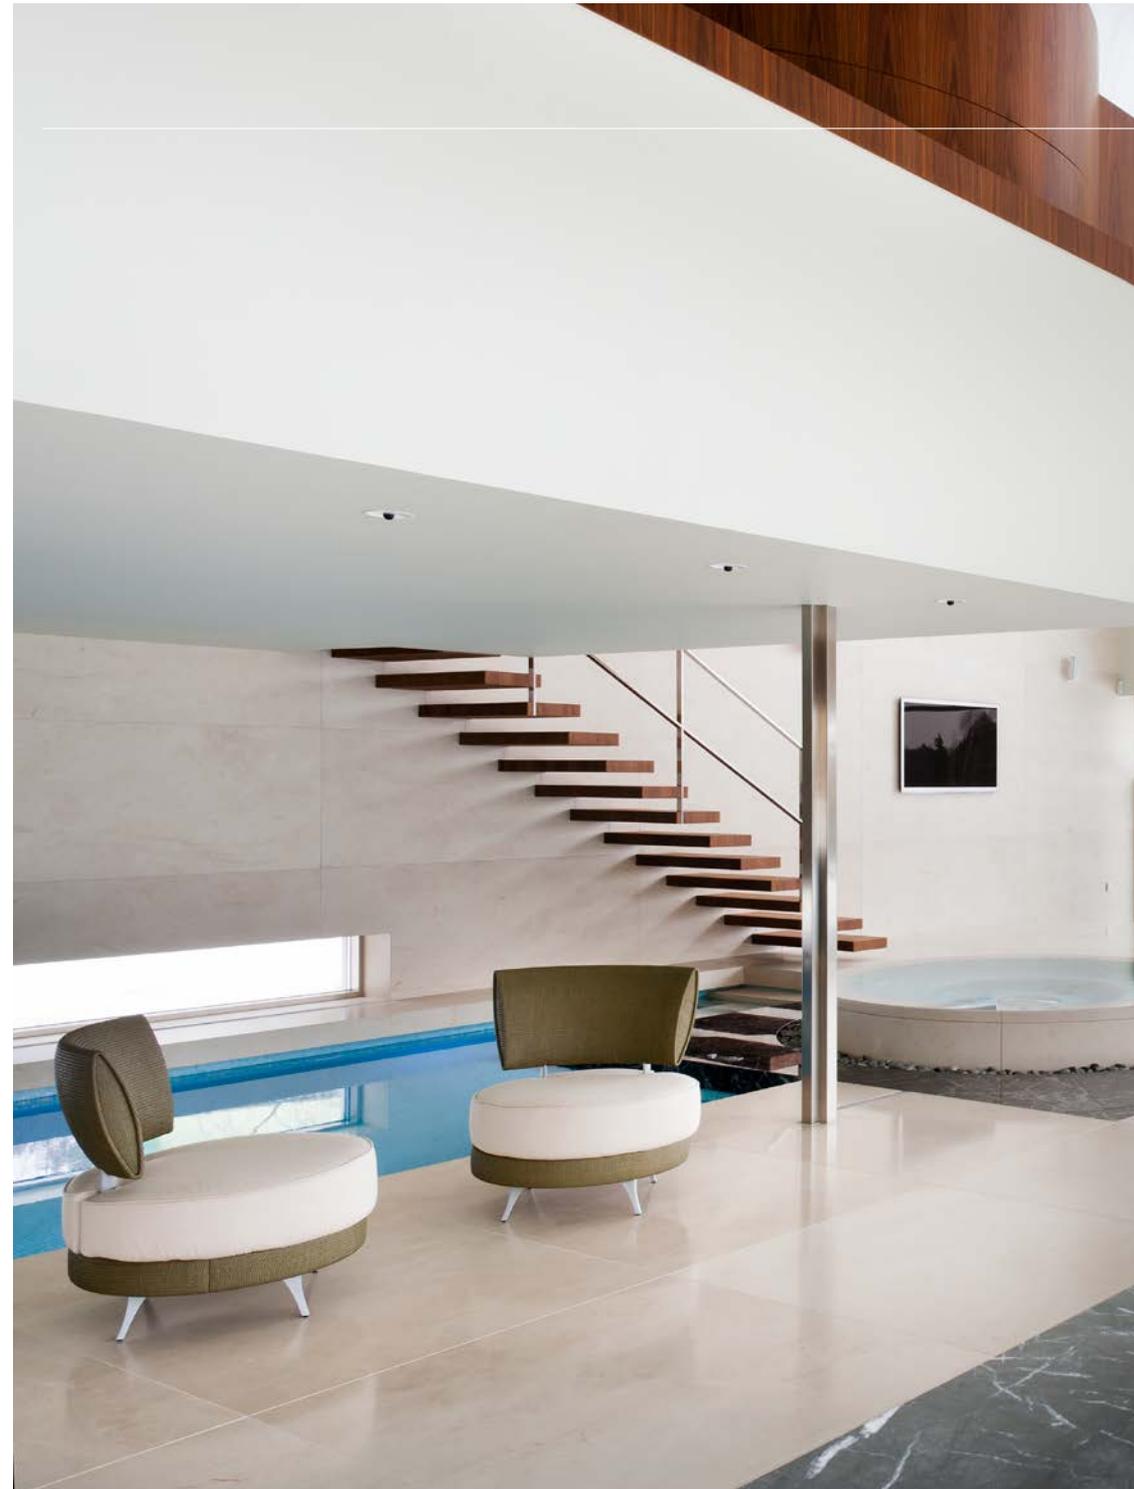

Levantina Group marble

Marble is synonymous with timeless elegance and exclusivity. Past and present combine in a crucible of inimitable colours, finishes and textures in the world of decoration and architecture. It is a noble and extraordinarily beautiful material characterised by its durability and versatility. It can be used to create a wide range of decorative elements, from furniture and worktops to floors and façades.

Levantina Group is the world leader in the production of marble, offering a wide range of marble in a broad variety of colours, textures, and finishes, which allow for the creation of unique and personalised spaces. Levantina Group marble is a high-quality material that offers exceptional performance and lasting beauty.

Marble is the ideal choice for any decor project, be it classic or modern.

It is a material that offers an amazing range of colours, from the purest whites to the most intense blacks. Levantina Group marble can be adapted to any space and interior design style.

Bush-hammered

Crema Antares

Finishes

Brushed - Polished - Honed

Crema Antares is a special travertine, an original stone in an almost intense yellow tone that radiates light and energy. As its name suggests, it exhibits a beautiful cream tone with a distinctive shade of yellow, giving it an original, unique character.

Crema Antares

Crema Marfil

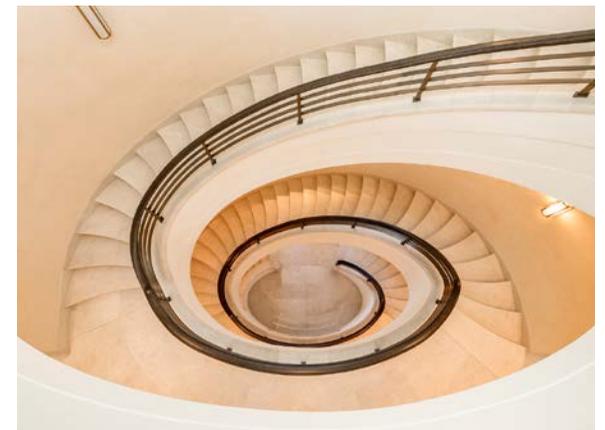

Finishes

Brushed - Polished - Rough, Honed - Sand-blasted - Bush-hammered

The world's most popular light ivory marble for any type of project, celebrated for the refinement of its shades and the subtlety of its natural veining.

This rare gem originates from extensive extraction operations carried out by Levantina Group in quarries located in the town of Pinoso, in the province of Alicante.

Crema Marfil

Spanish Gold

Finishes

Polished - Brushed - Honed

The Spanish Gold marble is an original stone that radiates light and warmth. Its irregular veining gives it a natural and elegant look, perfect for spaces that require a touch of sophistication. It features irregular calcite veins, with some accents of reddish veining.

The three-tone structure of this material evokes Spain's much-envied, sunny climate, bringing a shine and strength to the marble that is as unique as the country's own climatic characteristics.

Spanish Gold

Caliza Capri

Finishes

Brushed - Polished - Rough - Honed - Sand-blasted - Bush-hammered

A limestone with an elegant, snowy look, and a timeless beauty that will elevate the design of any project. This stone is a natural wonder that displays a subtle splash of grey or beige specks when studied from a close distance; the result of millions of years of interaction between the different natural elements.

These specks, however, never conceal the innate elegance and nobility of this material that evokes the essence of the Mediterranean. Able to withstand the passage of time, it remains unchanged, impeccable and majestic.

Marrón Emperador

Finishes

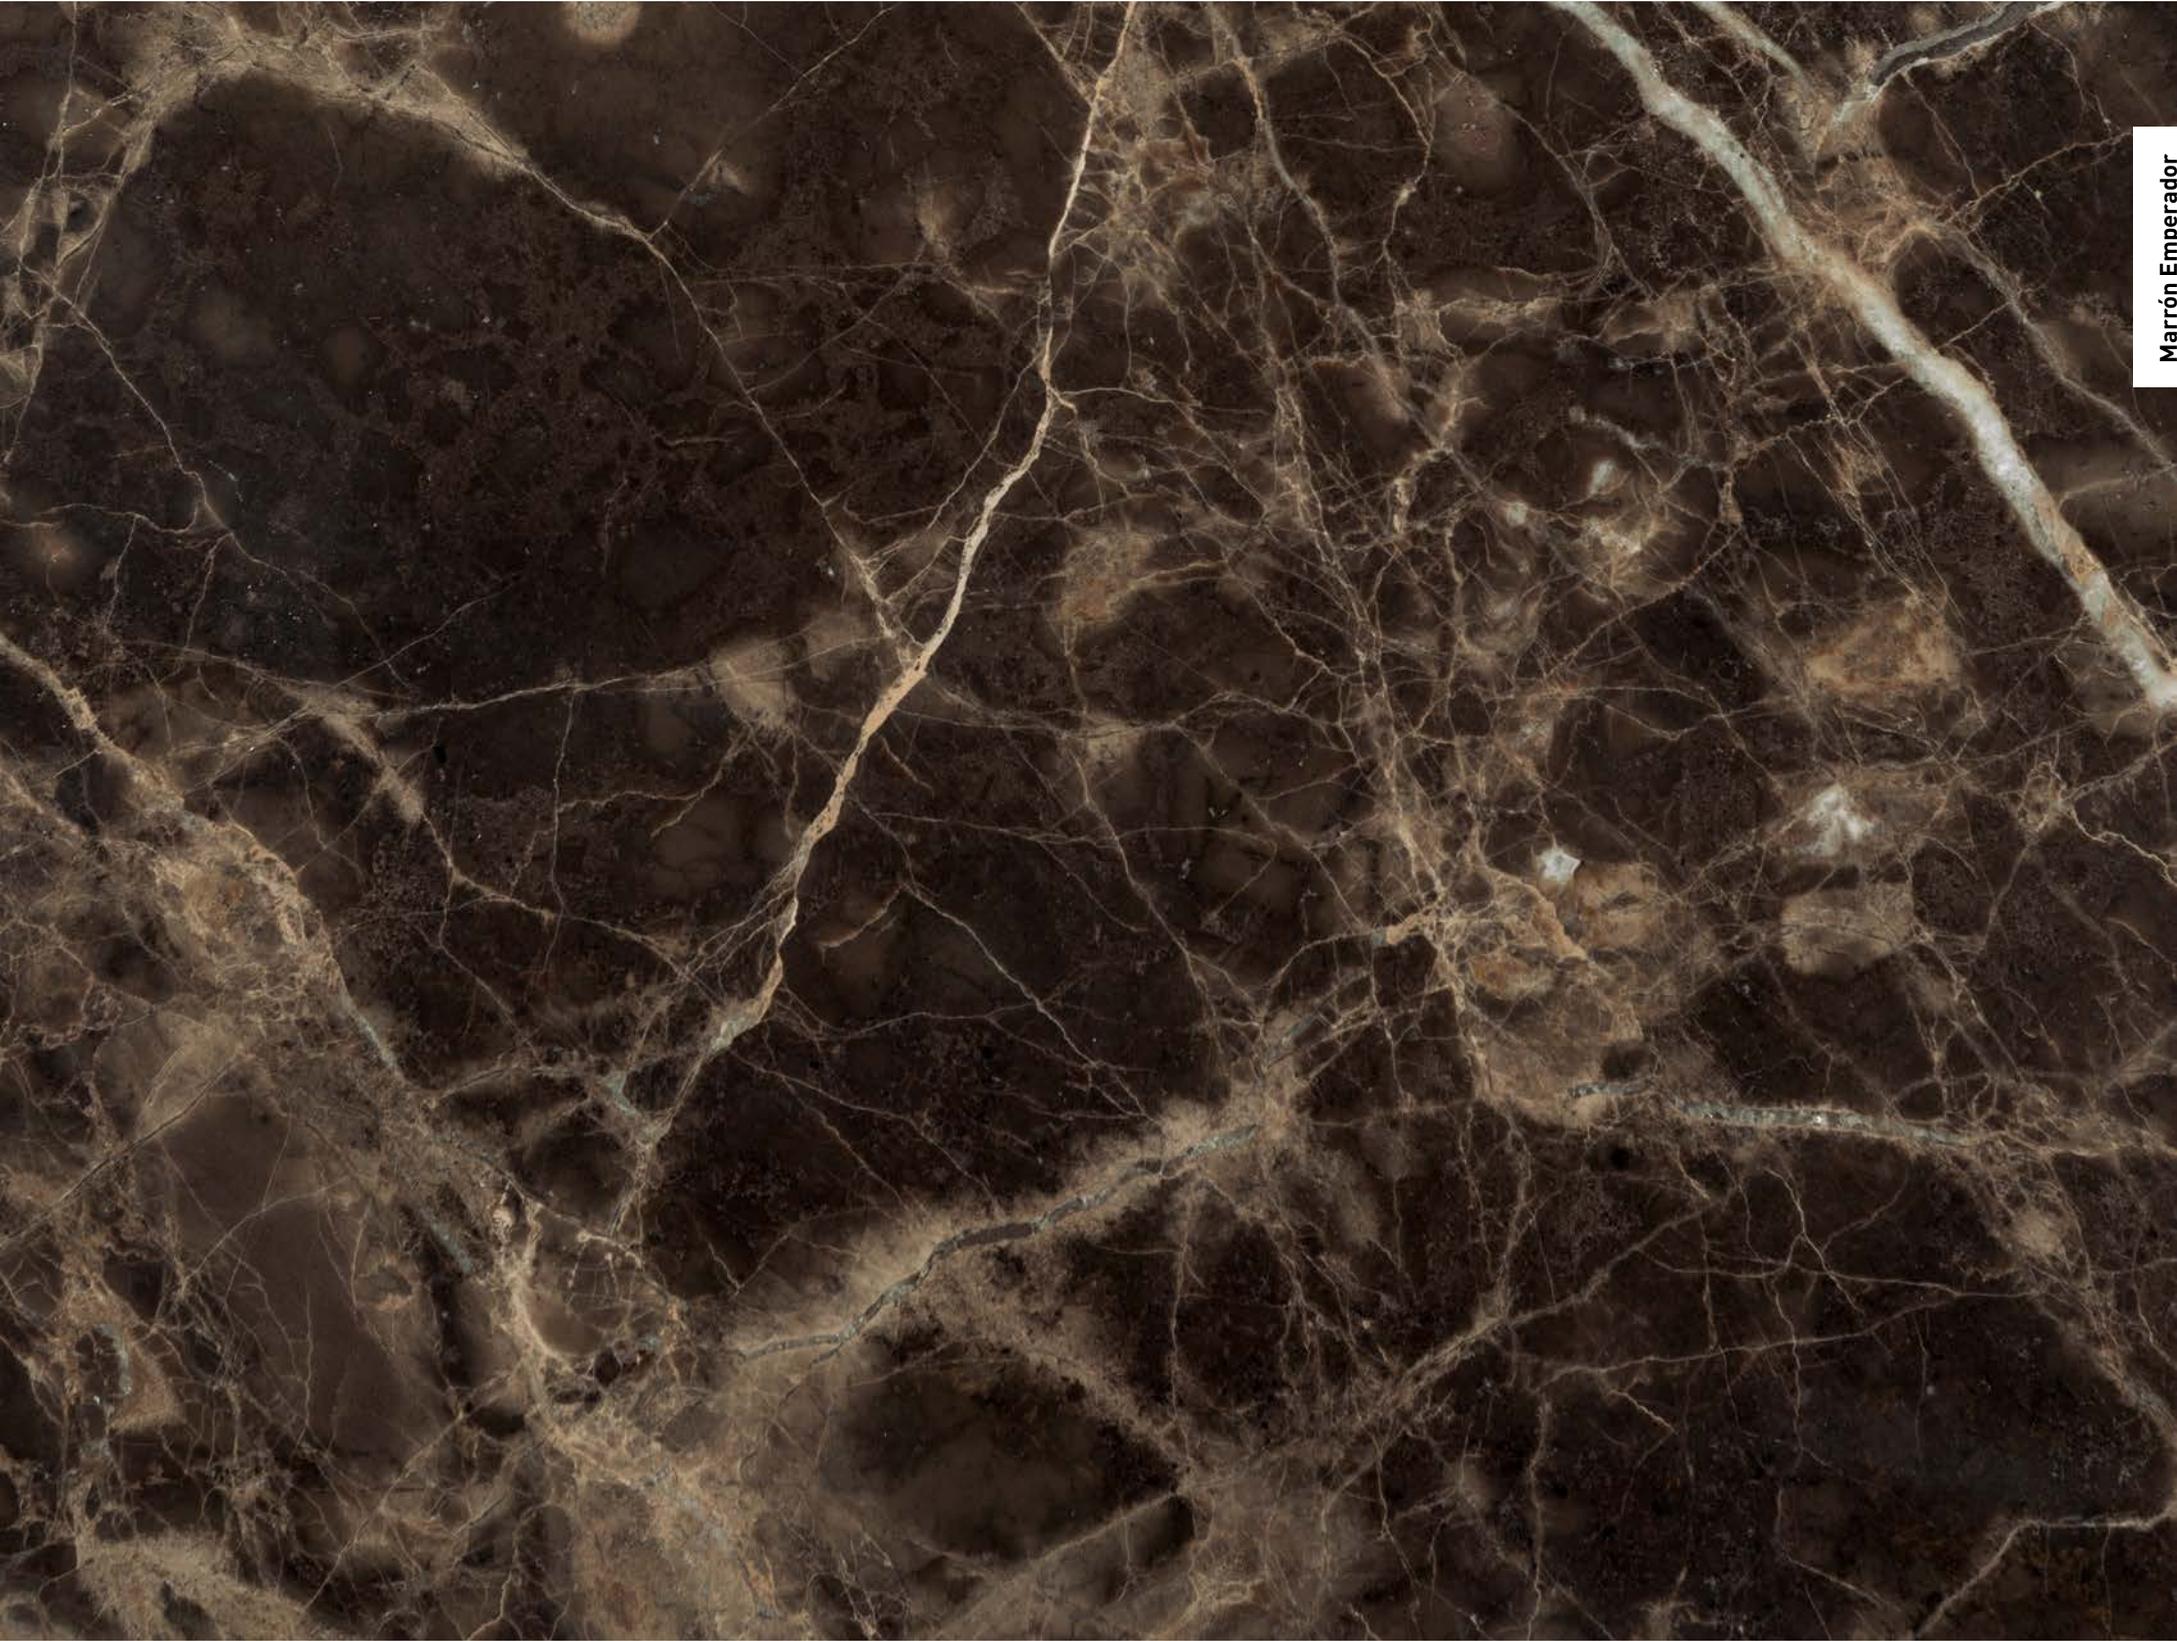

Polished - Honed - Sand-blasted

Powerful and extraordinarily strong, this marble offers the elegance of a truly unique and original stone, with undeniable excellence.

As its name suggest, Marrón Emperador, or "Emperor Brown", features a distinctive fusion of its predominant dark tone, which is interwoven in an unpredictable manner with veins of a lighter shade. These aesthetic characteristics make it one of the most popular materials on the market.

Marrón Emperador

Mistral

Finishes

Brushed - Polished - Honed

Mistral is a marble that attracts attention. Its natural light and beauty make it the star of any space, perfect for creating elegant and sophisticated environments.

Its light cream tone features a network of irregular veins in various colours, highlighting the predominant brushstrokes of white, blue and grey. It is a great choice for high traffic areas, as it brings luminosity and a sense of vastness to these spaces.

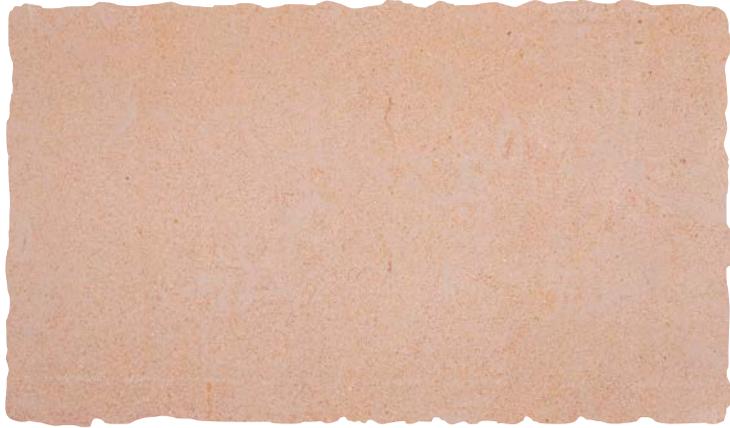

Niwala Pink

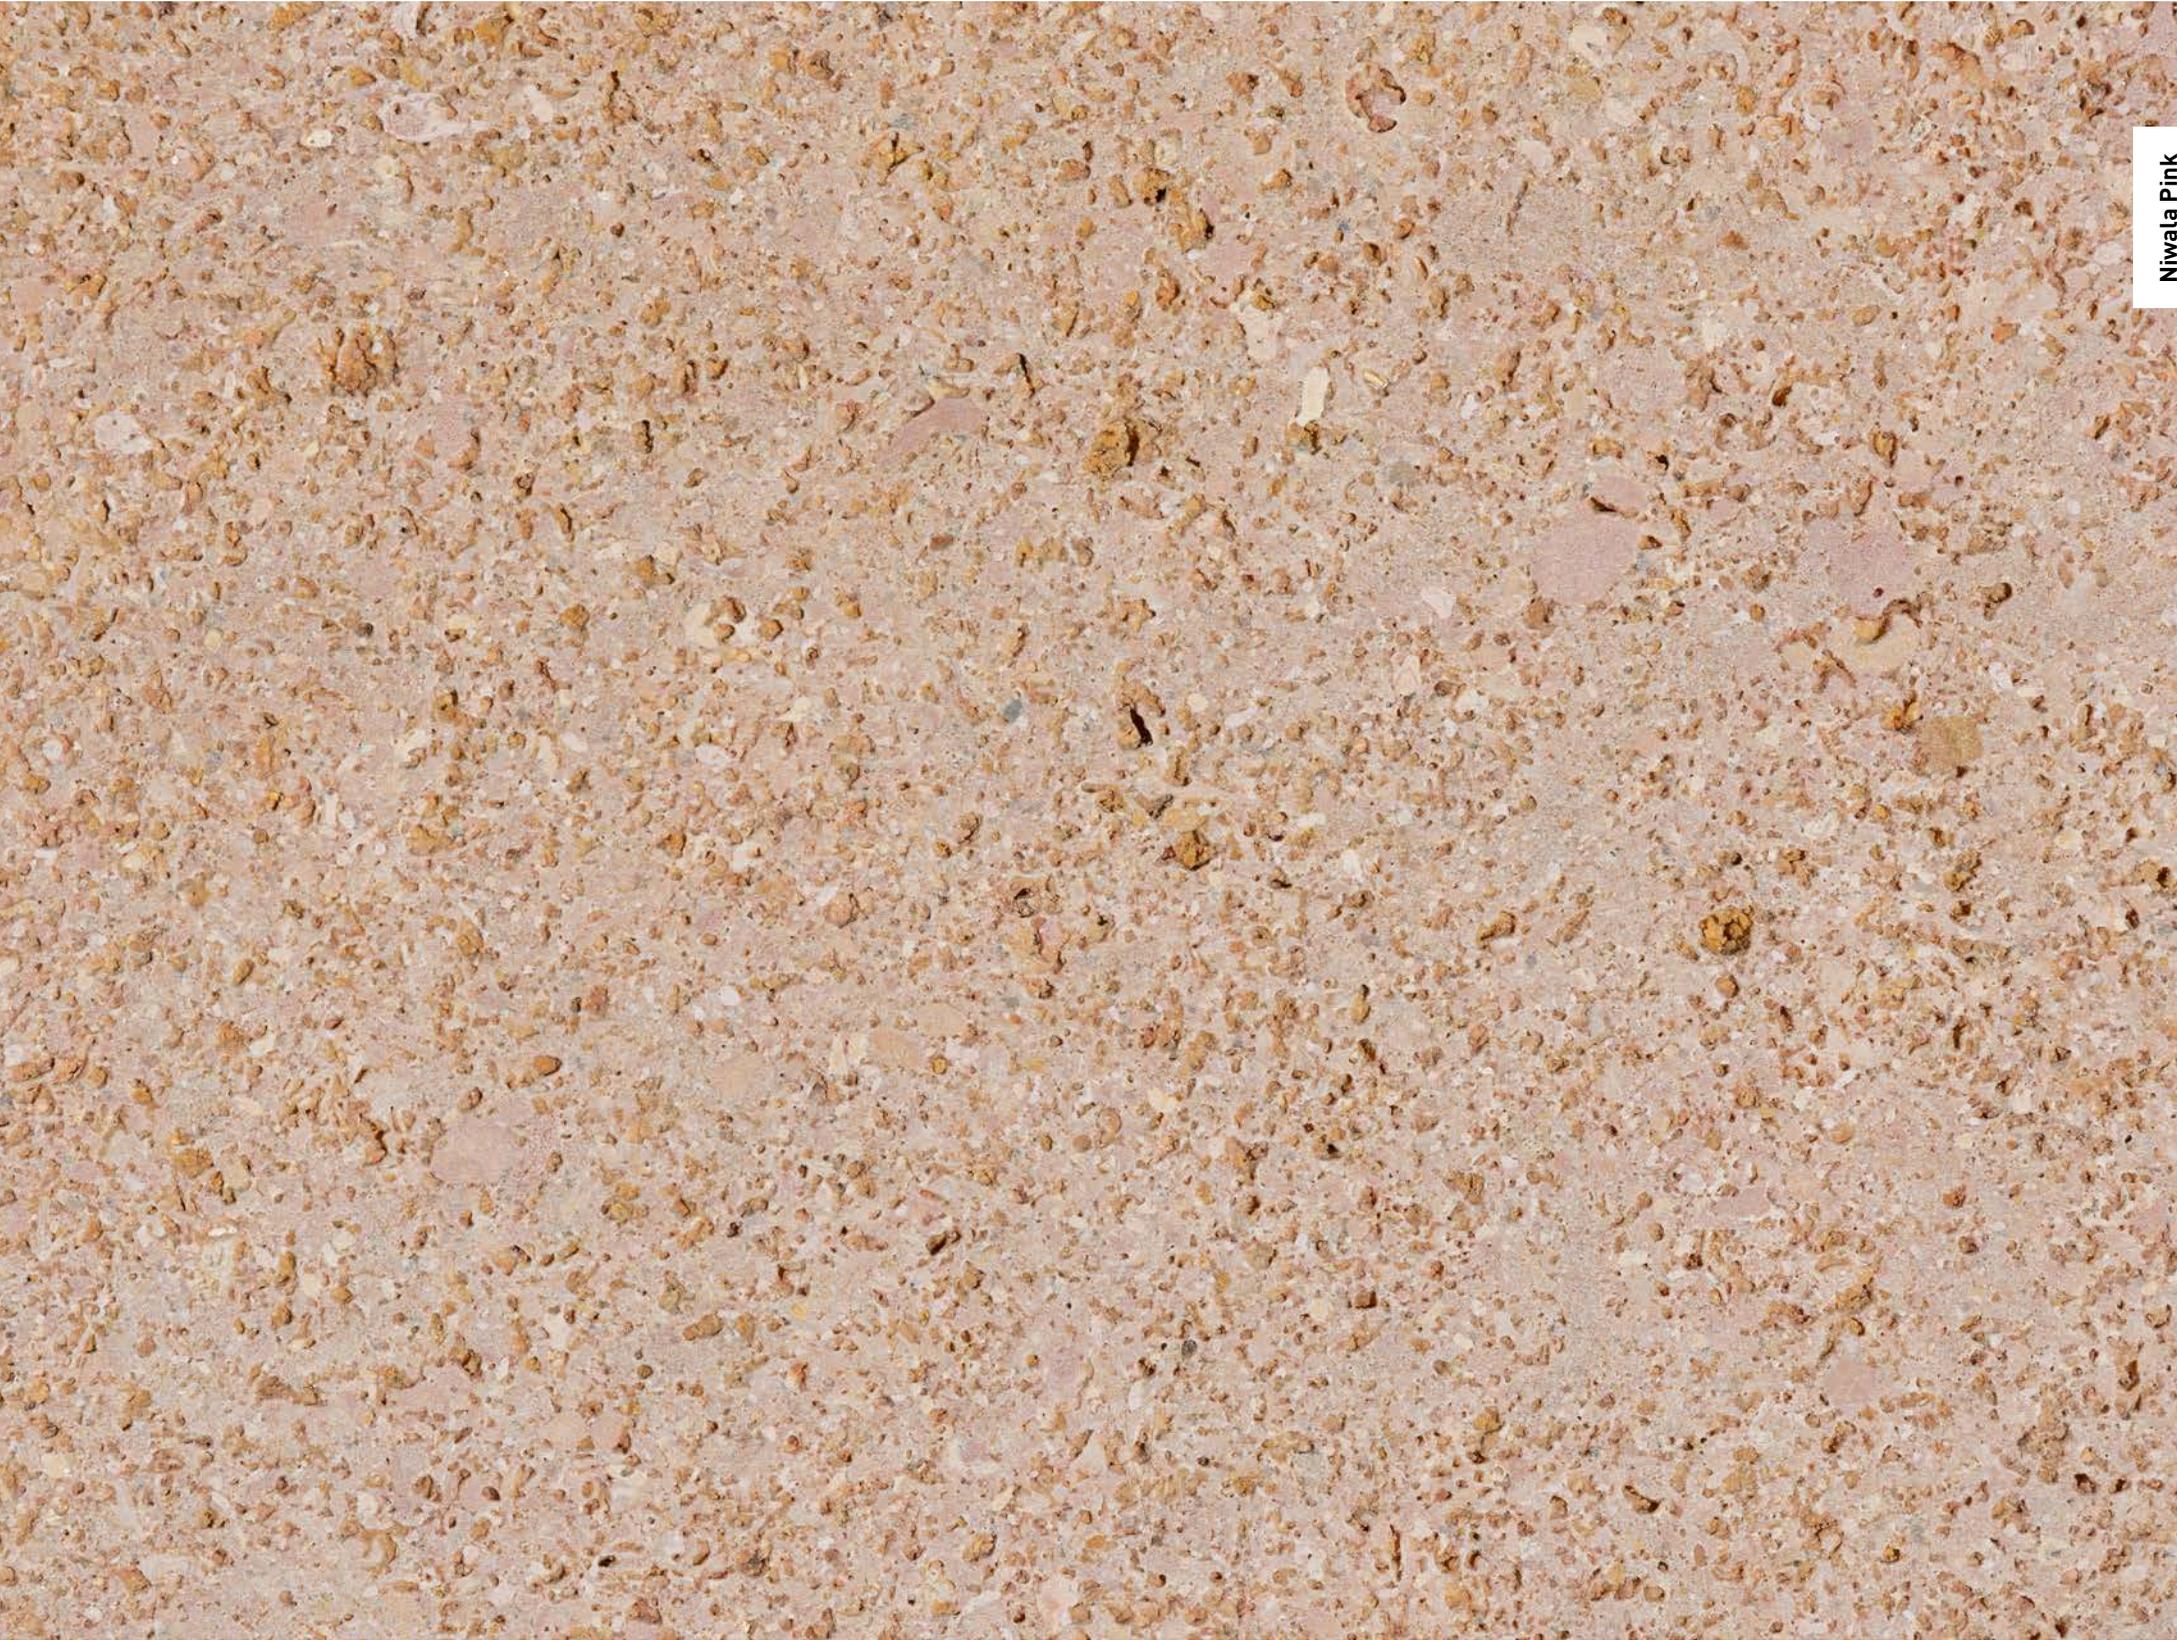

Finishes
Rough - Honed

Niwala Pink sandstones is an original stone that combines the beauty of the Mediterranean with the strength of the desert. Its intense pink colour, irregular veining and rough texture give it a unique and exotic appearance.

The rarity of this tone in the original stone sector makes this material a safe choice for projects focused on originality and elegance.

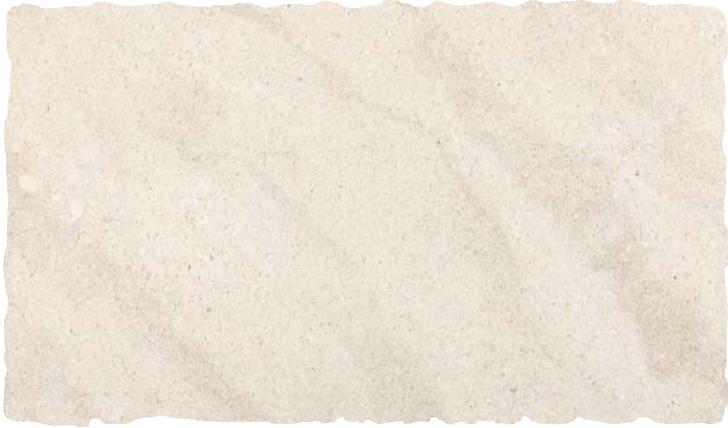

Niwala Pink

Niwala White

Finishes

Rough - Honed

Niwala White is a white sandstones that stands out for its homogeneity and porosity. Its creamy white colour and smooth texture make it an ideal choice for outdoor use, as it resists changing weather conditions.

Its extraordinary beauty lies in the visible inclusion of fossils and shells, which appear as small beige spots on the compact white background. It also has the added advantage of remaining unaffected by extremely cold temperatures or the most intense heat, which does not impact the temperature that emanates from walls and exterior floors composed of Niwala White.

Niwala White

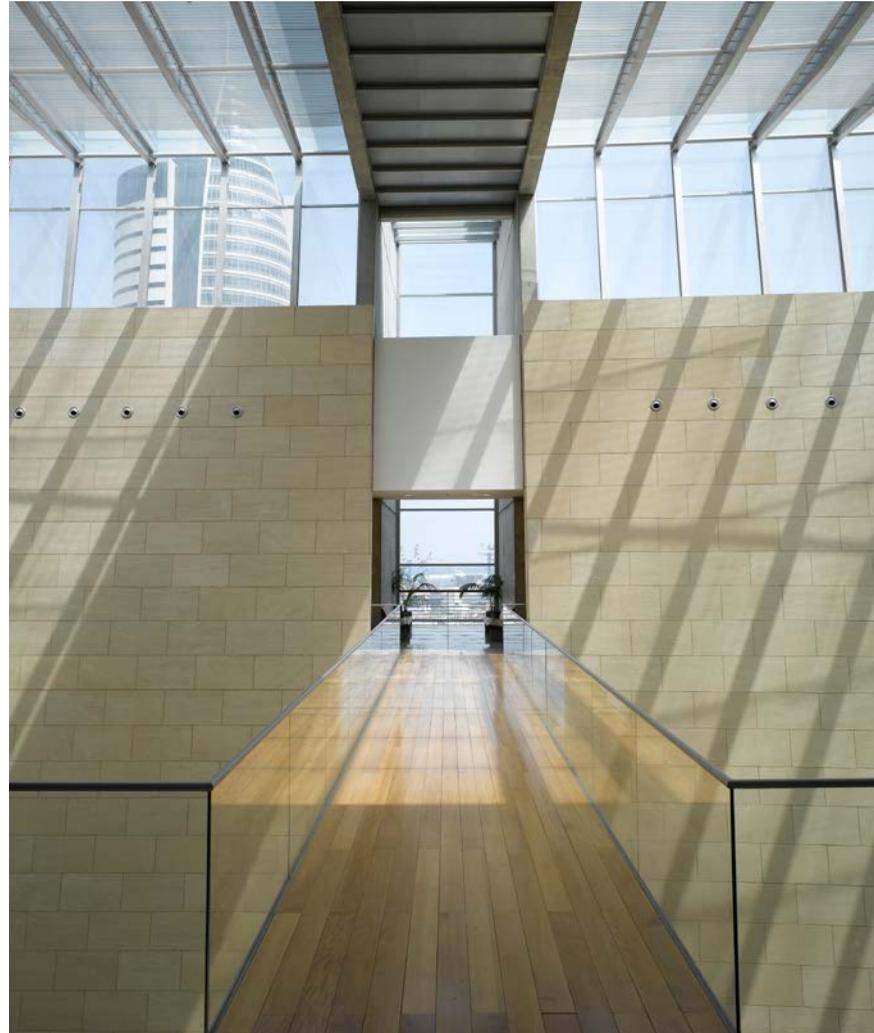

Niwala Yellow

Finishes
Rough - Honed

Niwala Yellow is an original stone with a rich and varied texture. Its veining and patterns give it a unique and original appearance, reminiscent of paintings or artwork.

The different Cuts, Vein or Cross, that can be carried out on this exquisite stone, allow it to fully express its aesthetic potential. This highlights specific aspects such as the level of porosity, the pattern of its veining and the abundance of fossils.

Niwala Yellow

Travertino Vallanca

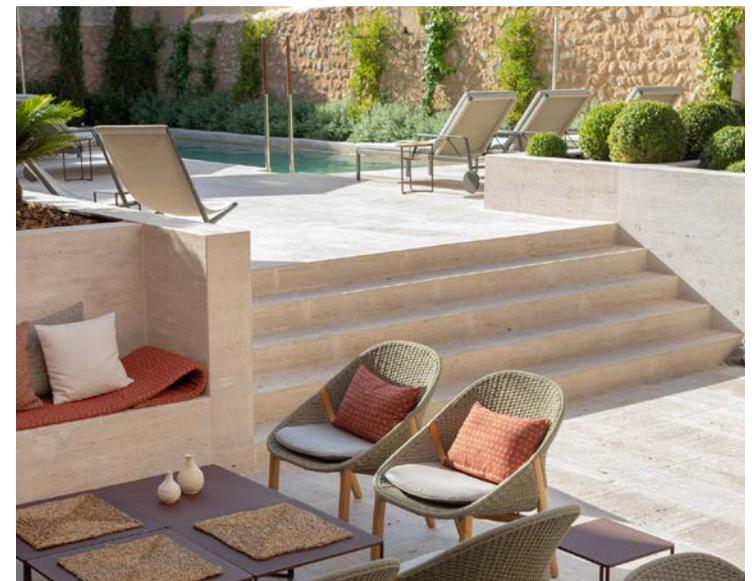

Finishes

Brushed - Polished - Honed - Sand-blasted

Travertino Vallanca is an original stone that radiates light and beauty. Its light cream colour and irregular veining give it a unique and attractive look. It is perfect for creating elegant and sophisticated spaces, both indoors and outdoors. The authenticity of Travertino Vallanca shines through in any context, regardless of its application.

This unique, ancient stone features a light cream tone with subtle nuances of beige, along with tonal strips that exhibit different textures and appearances.

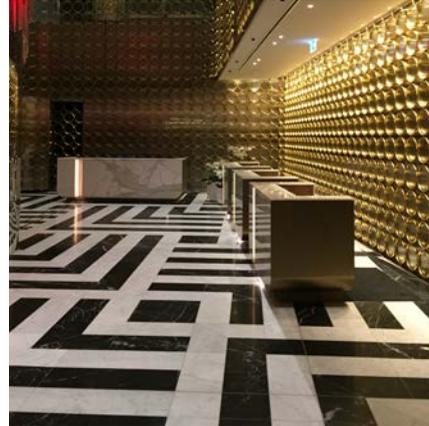

Travertino Vallanca

Negro Marquina

Finishes

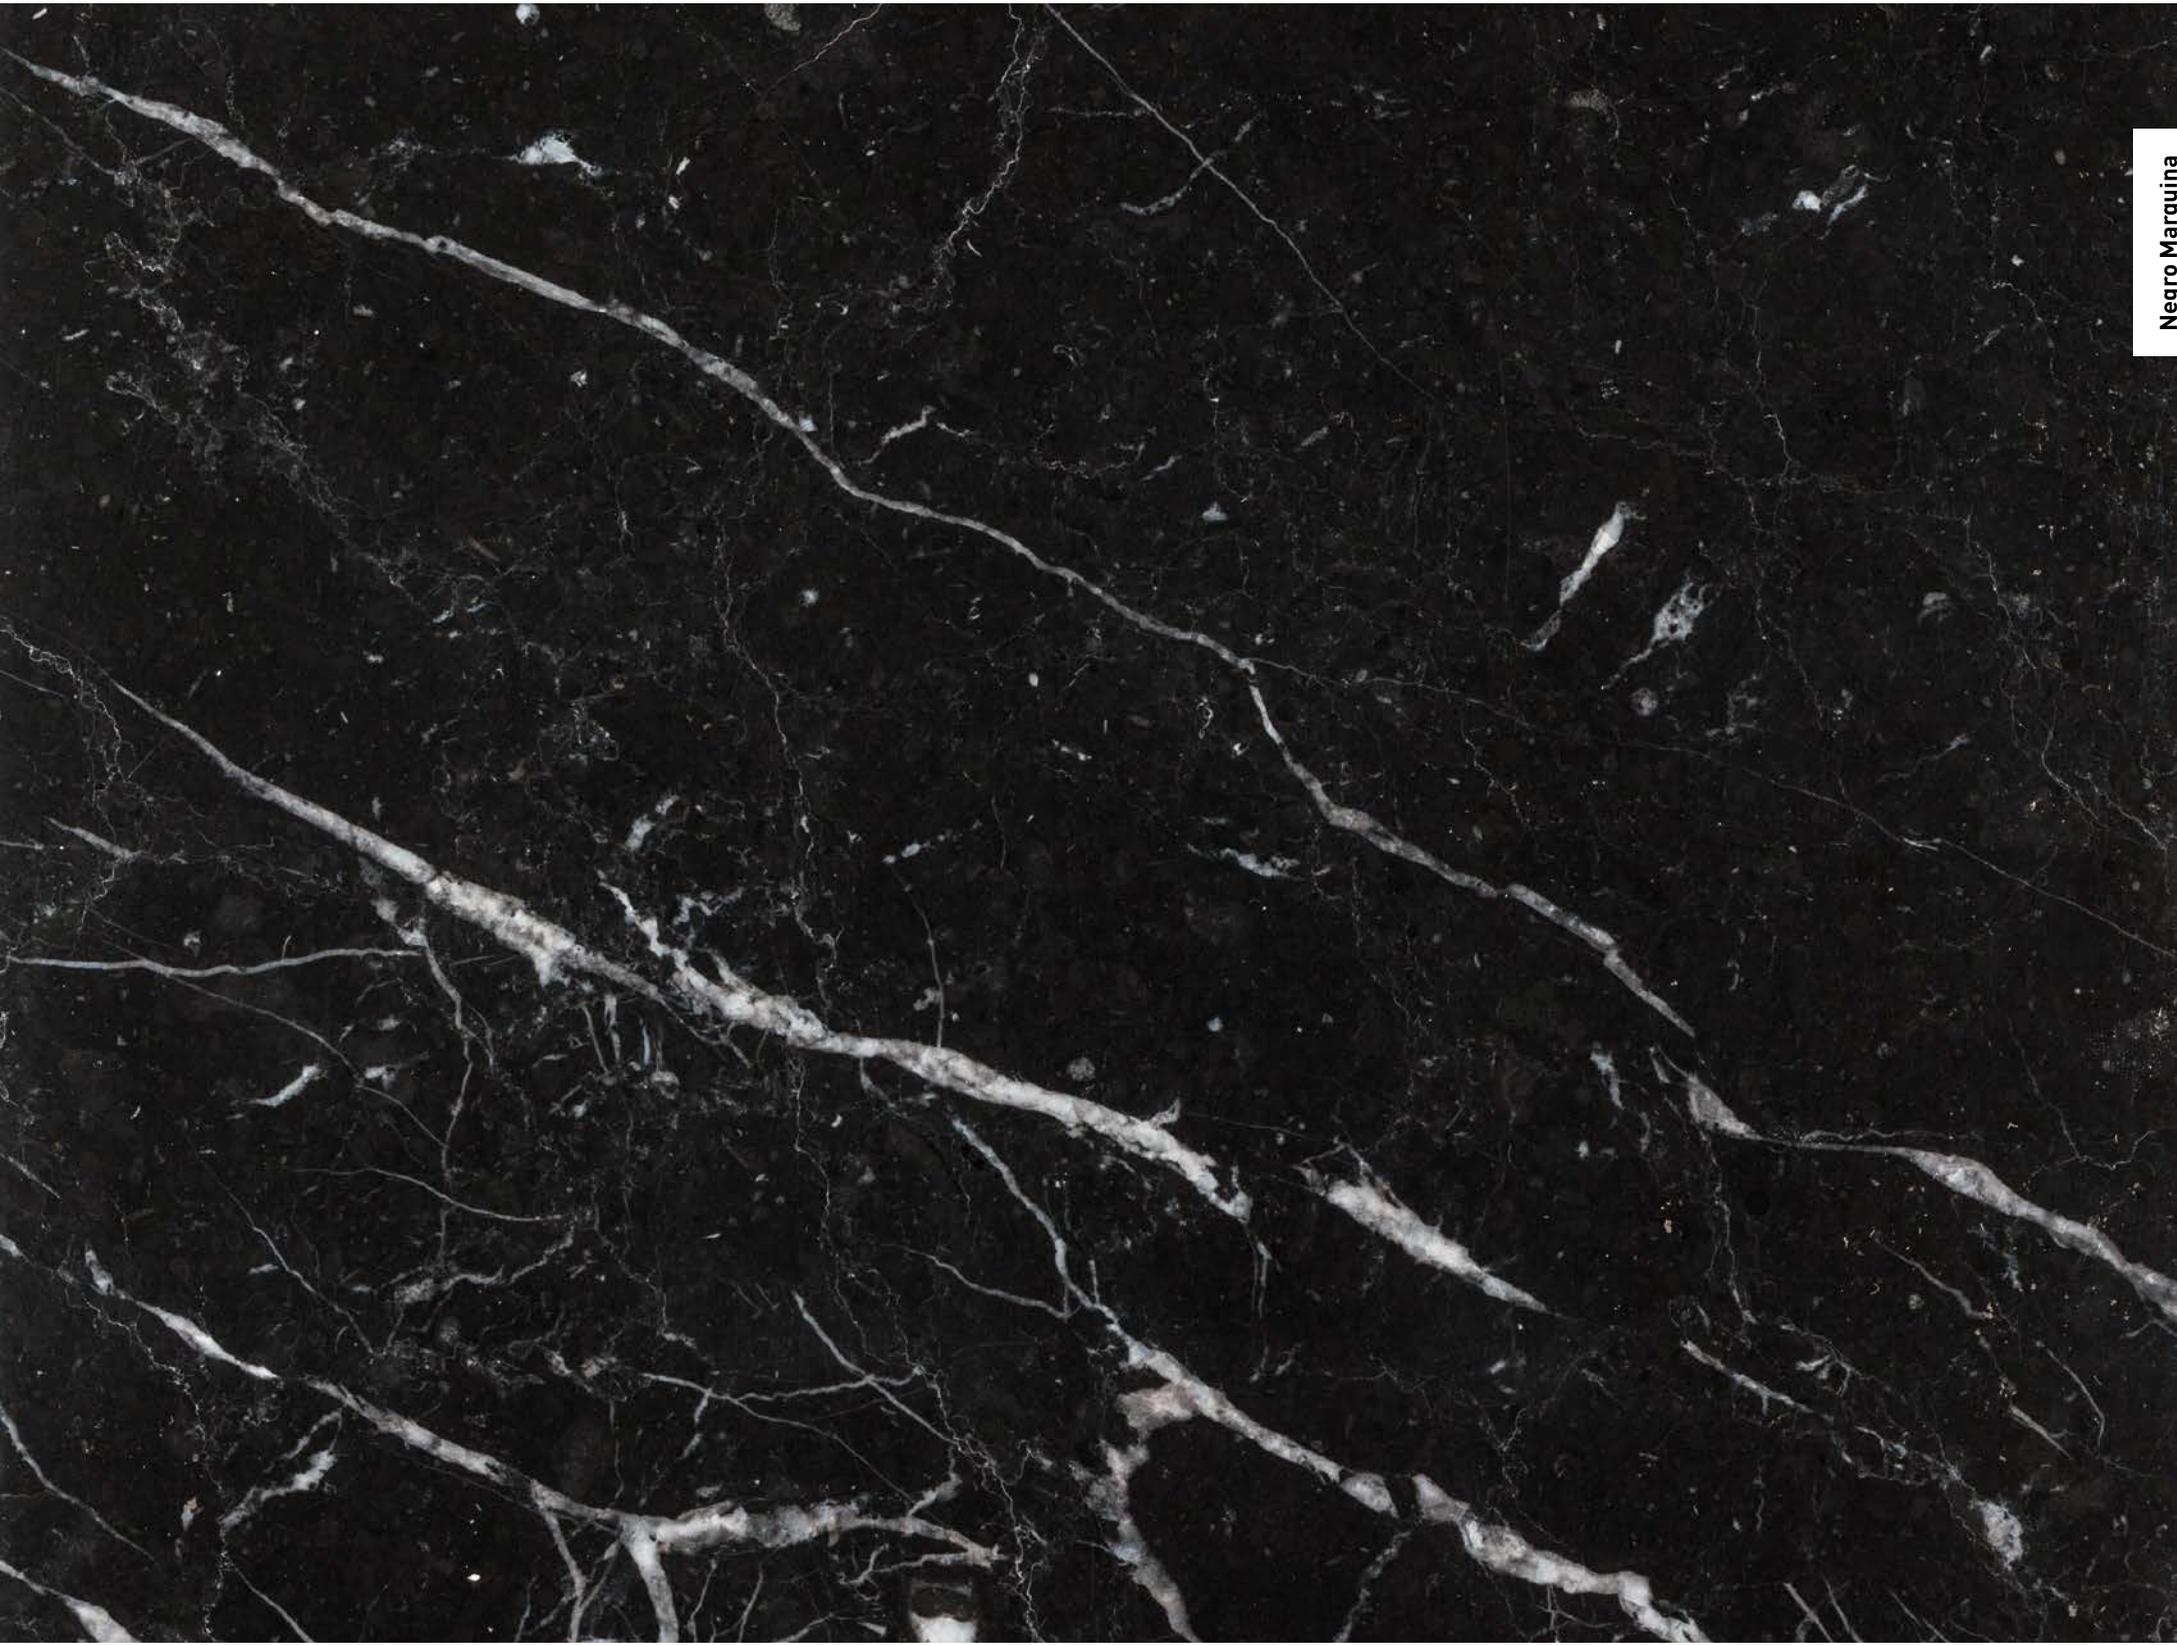

Brushed - Polished - Honed

The irregular white veining, with varying levels of concentration depending on the piece, act as a contrast with the rest of this stone and its black base.

This duality gives the stone a velvety feel that makes Negro Marquina a magnificent choice. Ideal for interior decoration on floors, walls, bathrooms, kitchen worktops and ornamental pieces, the combination of black with white brushstrokes is perfect, and offers endless aesthetic adaptations.

Negro Marquina

Atlantic Grey

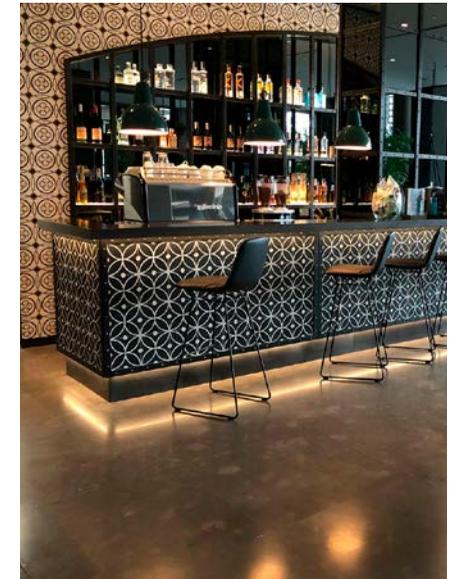

Finishes

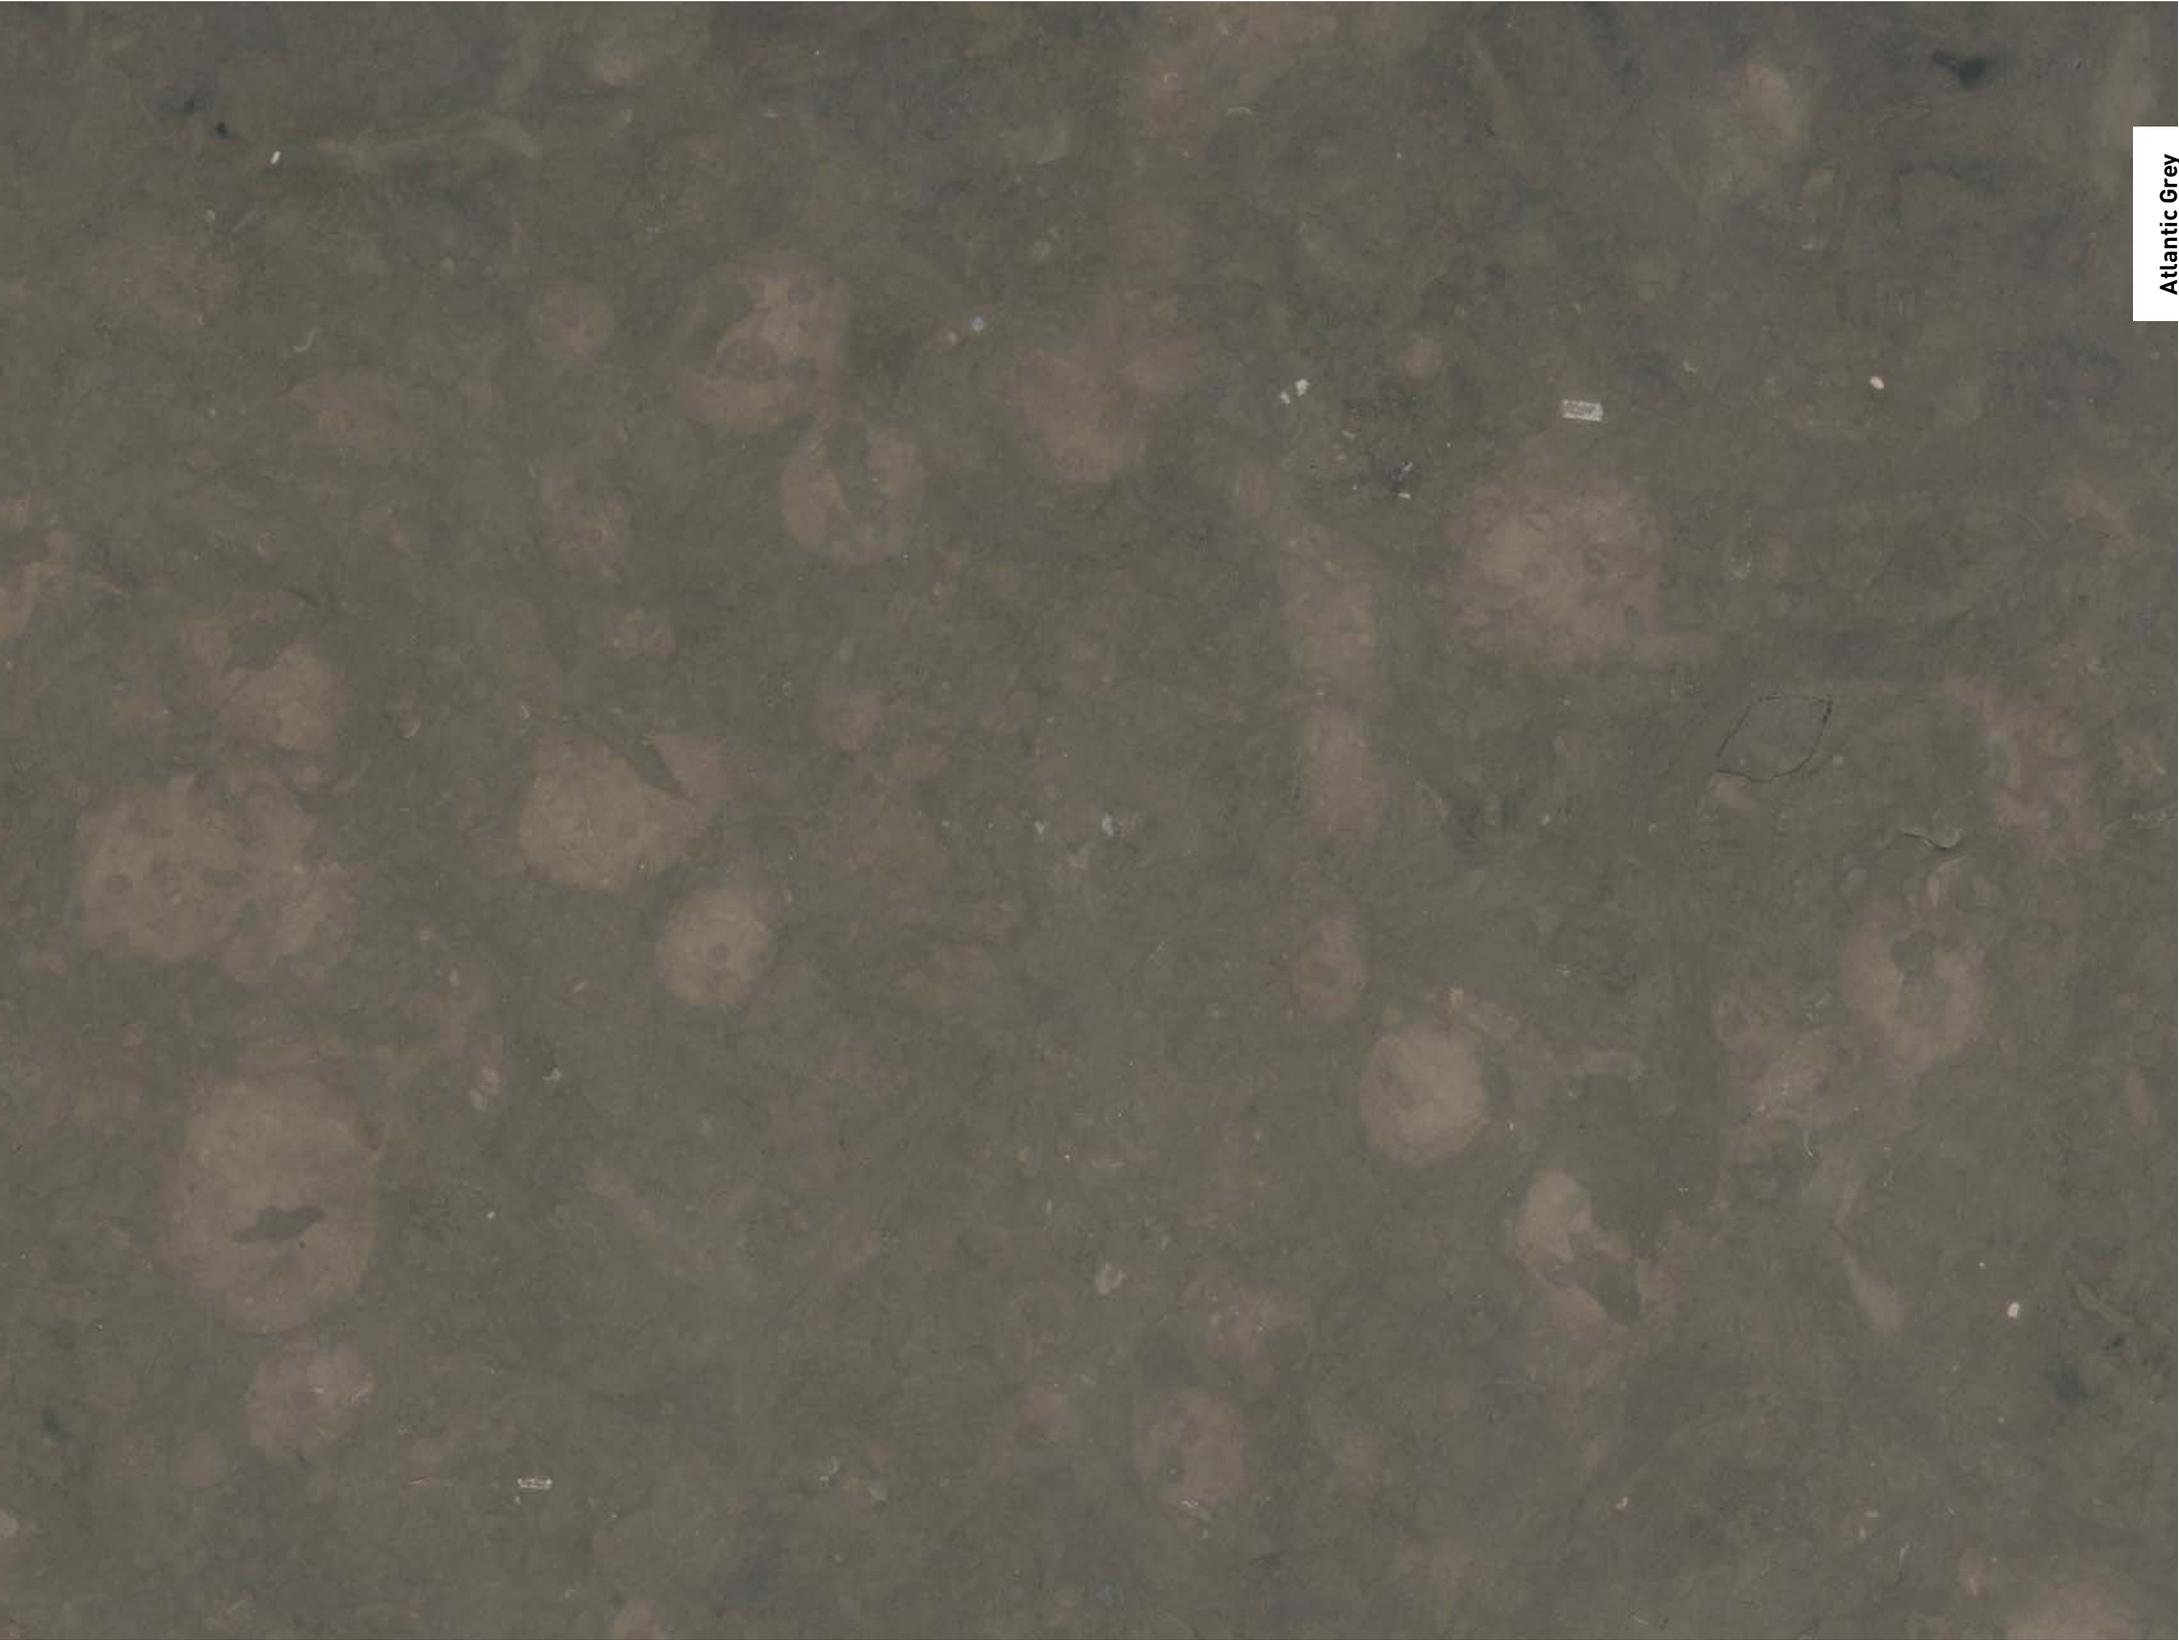

Polished - Honed - Sand-blasted

Featuring a visual uniformity and a homogeneous structure, Atlantic Grey marble has a soft grey colour with beautiful shades of cream.

Its attractive aesthetic lies in its great delicacy. One of the distinctive features of Atlantic Grey marble is its elegance and simplicity, derived from its organised and uniform appearance.

Atlantic Grey

Brecha

Finishes

Brushed - Polished - Honed

The beautiful and uneven look of this stone evokes the charming, cracked appearance that it takes over time. The colour and distinctive pattern of the rock allows for complete customisation of spaces. White veins, some very pronounced and others barely visible, are interwoven to form a soft and delicate brown surface.
